# VULNERABILITY DISCLOSURE PROGRAM

The security and privacy of our customers' personal information is of utmost importance to us at Circles Life. Circles Life appreciates the value that security researchers bring in order to improve the security of Circles Life systems. We are committed to creating a safe, transparent environment to report vulnerabilities.

If you believe that you have found a security vulnerability that could impact Circles Life or our users, we encourage you to let us know right away. We will investigate all legitimate reports and do our best to quickly fix the problem. We ask that you follow Circles Life's Vulnerability Disclosure Policy, HackerOne's Disclosure Guidelines, and make a good faith effort to avoid privacy violations, destruction of data, and interruption or degradation of our service during your research.

Circles Life uses HackerOne to triage and validate responsibly disclosed vulnerability reports. You can view more information about our Vulnerability Disclosure Program here.
